SUMMARY

Backend engineer with eight years building distributed systems in Python and Go.

Focused on payments infrastructure and the reliability of systems that move money.

EXPERIENCE

Staff Engineer, Northwind Payments

March 2021 - Present, London

- Led the migration of the ledger service from a monolith to seven services, cutting p99 settlement latency from 1.8s to 240ms.
- Designed the idempotency layer that made retried payment requests safe, eliminating a class of double-charge incidents.
- Mentored four engineers, two of whom were promoted within the year.

Senior Software Engineer, Calder Logistics

June 2018 - February 2021, Manchester

- Built the route optimisation service handling 40,000 daily shipments.
- Reduced cloud spend 34% by rewriting the batch pipeline in Go.

SKILLS

Python, Go, PostgreSQL, Kafka, Kubernetes, Terraform, gRPC, Redis
